What is Valtriox?

An overview of the invite-only beta and its current direction

Valtriox is an invite-only beta workspace for selected order, product, customer, marketing, team, reporting, and operational workflows. Available modules, limits, connectors, and support depend on the participant's plan, role, and approved beta configuration.

"Invite-only beta for selected brand-operation workflows"

Configurable

Workflows

Current Beta Scope

Valtriox is testing selected operational workflows in one workspace. Participation does not guarantee every listed module; availability is confirmed for each organization and can change as the beta is validated.

Selected Beta Modules

Examples only; availability depends on plan, role, and configuration

O

Order Management

Track orders through configurable statuses, priority levels, notes, invoices, returns, and fulfillment workflows from one workspace.

P

Product & Inventory

Organize products, categories, variants, pricing rules, stock alerts, reviews, and catalog records.

T

Team & Access

Manage members, roles, permissions, attendance, payroll records, tasks, and team conversations.

M

Marketing Workflows

Plan campaigns, email content, social activity, influencers, coupons, loyalty programs, and promotional sales.

A

Analytics & Reports

Review revenue, sales, product, and customer reporting to understand performance and operational trends.

C

Customer Management

Maintain customer profiles, purchase history, segments, notes, loyalty activity, and communication records.

D

Billing & Documents

Manage plans, payment approvals, invoices, proposals, and branded PDF documents in one coordinated workflow.

W

Operations Hub

Coordinate returns, shipping, packaging, suppliers, warehouse records, support tickets, follow-ups, and SLA tracking.

Benefits for Your Brand

Practical ways Valtriox can support your operations

Centralize Daily Operations

Bring orders, products, customers, marketing, team coordination, and operational records into one shared workspace.

Reduce Repetitive Work

Configurable rules, templates, and bulk actions can simplify recurring tasks and reduce duplicated effort.

Improve Operational Visibility

Dashboards and reports help teams review activity, spot trends, and make informed decisions with clearer context.

Support Clear Team Ownership

Roles, permissions, tasks, and activity records help each team member understand their responsibilities.

Strengthen Customer Follow-Up

Customer profiles, history, segments, notes, and loyalty records keep useful context together.

Grow with Configurable Workflows

Enable relevant modules and adapt permissions and processes as operational needs change.

How It Works

Getting started in four simple steps

1

Request Beta Access

Use the contact form to share the workflows you want to test. The team reviews requests during published business hours; access and follow-up timing are not guaranteed.

2

Conditional Beta Walkthrough

If availability and the current beta scope fit, review selected Valtriox modules and discuss which workflows may be configured for your team.

3

Recommended Setup Plan

Following the review, the proposed scope can outline relevant modules, configuration priorities, pricing, and an implementation timeline based on your requirements.

4

Configure, Review & Activate

After approval, the agreed settings, permissions, and available workflows can be configured for review. Activation and support remain subject to the confirmed beta plan.

Overview of Key Modules

A concise view of the main operational areas

Dashboard

KPI cards, revenue charts, daily summaries, activity, and quick actions.

Orders

Statuses, priorities, bulk actions, invoices, fulfillment, and returns.

Products & Catalog

Products, categories, variants, pricing rules, alerts, and reviews.

Customers

Profiles, history, segments, notes, loyalty activity, and communication records.

Marketing

Campaigns, email, social activity, influencers, coupons, and promotional sales.

Team & Access

Members, roles, permissions, attendance, payroll records, tasks, and chat.

Finance & Documents

Plans, approvals, invoices, expenses, proposals, and reports.

Operations

Returns, warehouse, shipping, packaging, suppliers, tickets, and SLA tracking.

Analytics & Reports

Revenue, sales, customer, and product reporting.

Events

Event records, themes, schedules, settings, and promotional workflows.

What to Expect

A flexible onboarding journey shaped by your scope

Discovery

Goals & Priorities

Review your current processes, team structure, and the modules most relevant to your operations.

Configuration

Workspace Setup

Configure agreed settings, branding, modules, and workflows around the approved scope.

Team Setup

Access & Guidance

Create team access, apply roles and permissions, and introduce the workflows each role will use.

Review

Workflow Check & Activation

Review the configured beta experience and confirm whether the approved scope is ready for activation.

Ongoing

Support & Improvement

Continue refining the workspace as business needs, processes, and available features evolve.

Timelines vary based on scope, integrations, data readiness, and configuration requirements.

What Approved Participants Can Expect

- A setup plan based on agreed priorities and requirements
- Role-aware access configured for the people using the workspace
- A workflow review before any agreed activation point
- Support and adjustments only within the confirmed beta plan
